

DUM

collection

Wiebe Boonstra and Marc van Nederpelt are the men behind Amsterdam-based furniture brand DUM. Both graduated from the Design Academy Eindhoven and worked together ever since. Their chairs, tables, stools and armchairs are used to create contemporary workplaces.

DUM's sustainable furniture comes in vivid colors and is usually slightly oversized, with a robust, solid feel. It's a style that is perfectly suited to large spaces and buildings. Spaces come to life, people connect, and ideas are born.

The DUM desks are available in lengths up to eight meters: inspired by (design) studios where people collaborate on large tables. The collection also features large, long and circular standing tables, as well as privacy chairs. These allow for variation and the creation of a healthier working environment. DUM furniture can already be found at the offices of organizations including Universal Music, Booking.com, Obvion, the Dutch Ministry of Foreign Affairs, Amazon, Philips, DSM, Frame Magazine, Wageningen University, Google, Pinterest, TNO, BDO Accountants, Yacht and BNN-VARA.

Beech wood is used in all of DUM's pieces. This sustainable, hard timber is perfect for bending and use in furniture making. The wood is grown in sustainable, managed European forests. When processing a beech tree little loss occurs due to the lack of knots and irregularities. Moreover, beech wood is sufficiently available, while other forests like oak are really under pressure.

DUM's furniture is produced locally with modern techniques combined with traditional crafts. To upholster their pieces, DUM has selected unique, knitted textiles produced by FEBRIK in Tilburg. DUM has created a production chain that not only contributes to reducing its CO2 footprint, but also enables it to quickly cater to clients' individual wishes.

beech board

beech board 540x160 stain black blue

beech board 280x160 natural

beech board

The Beech Board comes into its own in boardrooms, at the heart of the company where decisions are made and courses set. The Beech Board is a spacious table featuring a solid beech top and a fully solid beech base. It's an impressive 140 or 160 cm wide, so there's plenty of room to work on both sides of the table.

The Beech Board is available in five lengths. The unstained version steals the show with its natural blonde beech color. And the space in the middle? That subtly helps remove unsightly cables from view...

beech board 540x160 natural

beech largo

The Beech Largo is a safe working place, the 160cm wide tops guarantee social distancing by default. It is a spacious table featuring large separate tops and a fully solid beech base. And it's also an impressive 160 cm wide, so there's plenty of room to work on both sides of the table.

Like the Beech Board the Largo is available in five lengths. The space in the middle? That subtly helps remove unsightly cables from view...

beech connect 71

Beech Connect is a super flexible comprehensive table system based on the sturdy three legged Beech frames. It may serve as a desk in a flexible workspace, as an impressive - almost 8 meter long - canteen table or as a simple elegant round table.

Beech Connect comes in al large variety of sizes, materials and colours, to create a long canteen table or a big round standing table. The Beech Connect 71 is available as 130cm wide tables, creating big workplaces head to head.

Beech Connect comes in two heights; 74 and 103 cm to create a huge range of round and rectangular tables or standing tables.

beech basics 100

beech basics 71

Beech Basics are tables with the unmistakable sturdy look of four big round solid beech table legs can be effortlessly combined with Beech Connect. Ideal for canteens, conference rooms or restaurants.

Basics has a range of rectangular and square tables of 100, 160, 200 and 260cm tall in several widths.

beech chair

The Beech Chair is made from bended beech, has a refined backrest and a seemingly floating seat. The chair comes with a closed or open backrest, both surprisingly comfortable.

beech stool

Beech Stool is a three-legged solid beech stool with a steel footrest. Subtle details such as a seemingly floating seat and rounded legs make this bar stool elegant and refined.

Also available with back rests in two variations for exiting mix & match combinations.

beech stool 75 flat black

beech stool 75 low stain classic pink
beech stool 75 high stain light grey

beech sticks | new

The Sticks is sober yet elegant, bearing the characteristic, robust DUM signature. The cylindrical legs, the generous seat with delicate roundings: it's the form language of our complete Beech collection. With the DUM DNA flowing through its veins, this youngster is a seamless addition to the family.

For a soft landing, Sticks can be complemented with an upholstered Kvadrat seat. The fabric is available in three colours, each a fine match for the 10 + 2 DUM stains and lacquers.

Sticks effortlessly steals the show at high canteen tables, always has the best spot at the bar, and is a force to be reckoned with in the meeting room. It's worth noting that Sticks also has a handy, three-legged little brother, who comes into his own in an infinite variety of situations.

beech sticks 65 / stain dark green / seat Fabric Nitto 997 (special)
beech sticks 45 / stain wine red / seat Fabric Nitto 517 (special)

beech boy

Beech Boys love taking a place at the bar, but they are just as happy at a standing desk in a modern office. The Beech Boy is a robust, stable four-legged stool with an ergonomic seat and an elegant steel footrest. Also available with back rests in two variations for exiting mix & match combinations, offering additional comfort during longer sittings. Tested for NEN-EN16139 L2 (extreme use).

beech boy soft

beech bench

The Beech Bench has the refined and comfortable backrest of the Beech Chair. A special kind of furniture which has a home in many places. The Bench comes with or without a backrest.

beech bench backrest left zinc yellow
beech bench natural

beech side

Beech Side is a small handy side table matching with all the other Beech items. Made from solid turned beech the Beech Side looks like a funny giant chess piece.

beech side low zinc yellow sitan

beech private

Beech Private series was designed for breakout areas in an office environment or relaxation in home interiors. With its comfortable seats, goose feathered cushions and backrest upholstery the Beech Private creates a cozy shelter in open public space to make a telephone call, have a social meeting or just relax.

beech club

The Beech Club is a true eye-catcher. Perhaps thanks to her exquisite curves, which are further emphasized by the wide bordering. Soft and comforting, she is the perfect place to recline. Whether you choose a ton sur ton version or prefer attractive contrasting upholstery, there's always plenty of life at the Beech Club.

And there's also a Beech Club Bench, offering ample space for a productive tête-à-tête. Welcome to the Beech Club, where everyone's an honorary member.

panatella

Like the name suggests this armchair is for relaxing. The curved armrests, the soft varnished wood endows this piece a soothing touch. Comfort is maximized through the use of goose down in the upholstery.

 bottom right black / febrik gentle 0183-febrik triangle 122 (summit shown)

wagner easy

The open and informal design of Wagner Easy creates a spacious and friendly feel. Wagner Easy is upholstered with Febrik knitted fabrics. The Wagner is made from solid beech wood and available in many striking colors. Comfort is maximized through the use of goose down in the upholstery.

unkle+

The renewed classic Unkle+ easy chair system. More flexible and affordable than ever before. But its classic features still remain; oversized, playful and relaxed with minimal detailing. Perfect for large spaces and big impact. Available in any width with incremental steps of 30cm. So it fits in every space or project you have in mind. Start creating your own super long bench or cozy love seat.

Purchased by the Stedelijk Museum Amsterdam

punching bag

A leather punching bag. To let off steam, work out or simply look at. Handmade with supreme eco leather and strong stitching. Cotton filling, 1.50 meter and 40 kilograms. An essential for every office, waiting room or public space.

care and maintenance / disclaimer

Our products are manufactured from materials of the highest quality. We check the goods before they leave our factory, so the product quality can be guaranteed.

Wood

Every tree is different and equally, every piece of wood has its own unique structure and color, no two parts are ever the same. Other characteristics of these naturally growing materials are knots and structural variations. Our products may contain small, healthy, closed knots that have developed naturally in the growing wood. This limits excessive rejection and thus prevents material waste.

Wood is a natural material that breathes and reacts to the surrounding environment. This may cause color differences and/or micro cracks in the varnish or wood structure of the product. The colors and dimensions of wood might change as a natural reaction to environmental conditions such as humidity and temperature. These changes may lead to warping of the wood. The tolerance for wood is \pm 3-5 mm. To minimize this, we recommend using the products in a room with a constant humidity between 50% and 60%.

Prevent wood from being exposed to direct sunlight or other heat sources (fireplace, stove, radiator, etc.). This could lead to discoloration and/or cracks etc. of the wood.

Lacquered or stained wood products can have variable varnish absorption, stain absorption and/or surface structure due to differences in the wood structure and knots. Deviations cannot be avoided and will therefore not be accepted as ground for complaints.

For banded wooden furniture, we use solid wood that has not been treated with solvents or chemicals. Consequently, there may be color differences between the various parts. This is a natural feature of steam-banded wood and will therefore not be accepted as ground for complaints.

Veneer is a thin layer of wood and like solid wood, it is a natural product with all the associated properties. No two veneer sheets are identical. It is not possible to prevent deviations and will therefore not be accepted as ground for complaints.

Use on tables always coasters with felt to prevent damage and discoloration. Never place hot objects directly on your wood product this may cause stains which are impossible to remove. The first two months the paint is not yet fully hardened. Avoid heavy load such as vases. Make sure you do not leave anything on one area of the surface for a longer period of time, as this may cause stains and discoloration.

To clean wood and keep it in good condition, we recommend to clean the wood surface with a damp, soft cloth and rub with a soft dry cloth. For cleaning always a clean white cloth. Do not press too hard to prevent irreversible polishing of the surface. Spilled liquids must be removed from the surface immediately with a warm, damp cloth. Dry the surface directly afterwards with a cloth, wiping in the direction of the wood fiber. Do not let stains dry on the surface, but remove them immediately. The varnished surface of solid wood or veneer products will develop a patina within the first few weeks of use.

HPL

HPL is a material that can withstand scratches and high temperatures. The surface is smooth and non-porous, which makes it hygienic and easy to keep clean. Clean daily with a damp cloth. Be careful with hot objects. Always use a trivet when hot objects are placed on the blade. Sharp objects can cause scratches.

This material is resistant to mild household cleaners. Aggressive substances must, however, be washed away as soon as they arrive on the blade. Heavy objects can cause scratches by sliding. If it is prolonged too close to a heat source, the risk that the warmth penetrates into the underlying material, which is usually much more sensitive to prolonged heat. It needs no special care. It's easy to clean. Never use (liquid) abrasives or scouring pads. Normal, everyday dirt can be removed with a soft, damp cloth. Remove dirt and stains preferably immediately. More stubborn stains and dried-on residue can be removed with a mild detergent solution or usually mild (non-abrasive) household cleaning. When cleaning the mildest possible means should be used. In particular, you should not use products containing abrasives. Possible residues of cleaning products removed with clean water, after which the material is again nice glossy with a dry with a clean cloth.

Please read the instructions of Duropal/Pfleiderer: <https://www.pfleiderer.com>

HPL Arpa Fenix. Arpa Fenix is a 'smart material' which is designed for interior applications. The unique features of Arpa Fenix are due to the top layer. It features a nanotech coating that ensures that the surface feels silky smooth. It is extremely matt and does not reflect. The color therefore never disappears. Another advantage of this is that there are no fingerprints are visible. A unique feature of Arpa Fenix is the ability to repair minor scratches through heat.

Please read the instructions of Arpa Fenix: <http://www.fenixforinteriors.com/>

Fabric

Only high quality fabrics are selected for the upholstered furniture. The characteristics such as rack, pilling, fading and dirt repellency are different for all fabrics. The fabrics from our collection contain natural fibers may become discolored by artificial or natural light. Generally discolor light fabrics less than dark colors. It is best to direct sunlight on your products to minimize. Perspiration or grease from skin or hair comes into contact with the substance can cause stains, including medication use can cause reactions. Clean the upholstered furniture preferably only with a damp, clean white cloth and rub never hard about the matter. Furthermore, it is important to clean the upholstered furniture regularly with the soft nozzle of a vacuum cleaner so that the fabric between the fibers do not accumulate.

Please read the instructions of Kvadrat: <https://kvadrat.dk>

Leather

Leather is a natural product. The processed leathers by us are of a high quality. Leather is a natural product and there are always some natural features present. These features emphasize the authenticity of the leather, this can include scarring, structural differences are insect bites or neck folds. This is no reason for rejection, this prevents excessive material waste.

It will discolor by artificial or sunlight or by placement near a heater or radiator. Shine or dark spots can occur in places where there is a lot of contact.

Please read the instructions of Ohmann: <http://www.ohmannleather.com>

Steel / aluminum

Steel and aluminum have a robust appearance. It does not require special care. It's easy to clean. Never use (liquid) abrasives or scouring pads. Normal, everyday dirt can be removed with a soft, damp cloth. Remove dirt and stains preferably immediately. More stubborn stains and dried-on residue can be removed with a wrung microfiber cloth. Use mild soap or usually mild (non-abrasive) household cleaning. No means use products containing abrasives. Make the material spotless with a dry clean cloth .

Wool

Wool is a natural product and will discolor by artificial or sunlight or by placement near a heater or radiator. Generally lighter colors fade less than dark colors. It is best to avoid direct sunlight as much as possible and not too close to a heat source such as stove, fireplace, or radiator.

Please read the instructions of Wools of New Zealand: <http://www.woolnz.com>
